Armoury Meeting Called For On Evening June 10

A meeting of all those interested in getting the proposed new armory in Gleichen is called for at 8:30 o'clock in the evening of Monday June 10th.

At the last meeting of the citizens committee in charge of campaigning for the new armory, it was decided that the public should be invited to a meeting. At this meeting they would be shown and told what the reserve armory will mean to everyone in the town and district. At this meeting pictures will be shown to help explain how the new armory will be used. It will also be explained that the new building will be a community centre where both men, women and children can make use of the centre.

Increased Barley, Oat Prices Urged By Line Elevators

Charging that the prairie farmers are compelled by the government to dispose of their coarse grains to eastern and British Columbia at less than the true value of these grains the North-West Line Elevators Association has urged the Dominion government to increase the selling prices on barley to 92 cents and oats to 73 cents per bushel, it was announced. Settlement on this basis is proposed on all oats and barley delivered by farmers since August 1, 1946. Present selling prices of barley is 64 cents and oats 61 1/2 cents per bushel.

The Line Elevator Companies also urge the government to restore the premium of five cents per bushel to growers of maturing barley.

In its submission to the Prime Minister of Canada the Line Elevator Companies further point out that prairie cattle, hog and poultry producers are forced to compete against the highly subsidized eastern and B. C. feeders and to pay their own freight on movement of livestock to market. Between October, 1941, and March 31, 1946, the Dominion government paid \$63,592,000 in freight subsidies to eastern and B. C. feeders.

Renewal is made by the Line Elevator Companies of their proposal for increased wheat prices to farmers. A price of "not less than \$1.80 per bushel" on all wheat grown in the province and exported from Canada since August 1st, 1946, is suggested. The same price is urged upon the government as an advance payment on the 1947 crop to be delivered by farmers to the Canadian wheat board.

In a communication to the North-West Line Elevators Association, the Prime Minister's office advises that the proposals for increased prices for coarse grains and wheat have been referred to attention to the wheat committee of the Dominion cabinet.

OBITUARY

JOHN JAMES WHITSIDE

John J. Whiteside who had been living at Eventide Home for the past five months died last week at the age of 67 years.

Mr. Whiteside was born in Ireland and came to Canada 22 years ago. He came to Gleichen from Calgary and was a watchmaker by trade. He is survived by his wife. The funeral was attended by quite a few relatives and friends from Edmonton and Calgary. The funeral services were conducted in the auditorium of Eventide Home last Wednesday afternoon at 2 o'clock by Major A. F. Parkinson assisted by Revs. Day and Jackson of Calgary. Interment was made in Eventide Home cemetery.

ALBERT CARR

Albert Carr, age 64 years, of Thaler, Alberta died at Eventide Home early last Thursday morning. He had been a resident at the Home for the past five months. Born in England he came to Alberta about 28 years ago. The remains were forwarded to Thaler for burial Thursday afternoon by G. W. Evans.

Chancellor Won Ball Tournament Empire Day Sports

Gleichen's annual sports day held Friday proved to be a huge success. The largest crowd for some years turned out and no doubt the ideal weather had much to do with the success of the show.

Gleichen's new band was on hand to entertain the afternoon. Considering the short time that has lapsed since it was organized the boys played remarkably well.

The first baseball game between Standard and Cluny resulted in a win for the latter club. The second game between Meadowbrook and Chancellor saw the last named club walk off with the honors. The final game played in the evening between Chancellor and Cluny saw Chancellor declared winners.

During the afternoon many kinds races and sports for the children were run off. These events were watched by a large number of admiring friends and relatives. The usual enthusiasm displayed by the young folks kept the older people interested until the end.

In the evening a very large crowd attended the dance in the Community Hall and thoroughly enjoyed themselves. This ended another 24th of May celebration which started here when Gleichen was first put on the map.

LOCAL NEWS ITEMS OF THE TOWN AND DISTRICT

Lost you forget. Milk goes up in price next Saturday!

Several nice showers of rain fell over the district Tuesday morning.

Mr. and Mrs. Peter Kelly are spending a few days in Calgary.

Mrs. N. Whitcomb who is on the staff of Col. Belcher hospital in Calgary spent Sunday in town visiting friends.

Hugh Hamar, of the Royal Bank, Calgary spent the weekend in town visiting his parents Mr. and Mrs. H. Hamar.

Pte. Alberta Richards of Calgary spent the weekend in Gleichen and Bassano. In the latter town her mother is seriously ill in the hospital.

Lo Woods is in the Bassano hospital where he had his tonsils removed.

Mr. and Mrs. Cam Brown and Mr. and Mrs. C. C. Brown attended the Alberta Hotelmen's Association convention in Edmonton.

Several Gleichen ladies attended the shower for Miss L. Bell at the home of her parents, Mr. and Mrs. G. Bell northeast of town Monday.

Jimmy Rousche has gone to Bassano where he will enter the hospital for an operation.

Plans to welcome tourists to Alberta and encourage them to stay in the province were discussed at the recent provincial tourist conference in Edmonton. The suggestion which was approved was that welcoming stations be established at points of entry where full information would be obtained concerning the tourist's plans and needs. It was recalled that the Alberta Motor Association had been exploring the possibility of making the conference also suggested the need of providing information of historical points of interest in the province, feeling this would make a special appeal to tourists. The conference also approved the idea of exploring the possibility of making a greater use of Indian camps as an attraction to tourists visitors. A resolution was passed calling for federal aid in the improvement of highways leading to the national parks. Delegates told of indications of a greatly increased tourist flow this year the main problem being that of adequate accommodation.

ST. ANDREW'S CHURCH

There will be Confirmation Service in St. Andrew's Church on May 30th, at 7:30 p.m.

This service will be conducted by The Right Rev. H. R. Ragg, M.A., D.D., Bishop of Calgary.

Lutheran Church' Members Contribute Heavily To Relief

At a special Mother's Day service held in Christ Lutheran Church, Gleichen on Sunday, May 19th, the members brought a special offering for Canadian Lutheran World Relief. The World Relief Organization is gathering funds and clothing for the starving and destitute in Europe. Even though the Christ Lutheran Church is one of the smaller churches in the district, the members contributed a very substantial amount to this cause.

A total of \$436.37 was contributed, making it a fine average of over \$20 per communicant member. A clothing collection is under way, all members contributing. Clothing may be left at the home of Mr. and Mrs. O. Kirstein in Gleichen. It will be picked and shipped to the Winnipeg warehouse for shipment overseas.

A number of the young people of Christ Lutheran Church will attend the Lutheran League Rally at Fort McMurray, Alberta, to be held on June 22nd and 23rd.

Since Capt. Bombach, a chaplain with the Canadian Army overseas, has returned and is taking charge of the Lethbridge parish, Rev. Peter H. McMillan will be serving the Christ Lutheran Church, Gleichen, more frequently in the near future.

The next service is scheduled for Sunday, June 9th, at 2:30 p.m.

"You are doing so much now that I cannot think of anything. Canada can do more." Rt. Hon. Herbert Morrison Lord President of the Council in the United Kingdom Government told a press conference in Ottawa.

The Morrison had been in Canada with the Minister of Agriculture and Fisheries at Dorval Airport near Montreal. Hon. Mr. Gardiner and Hon. Mr. Briggs were on their way to Washington.

Mr. Morrison told the press conference that he had been assured of the continued "warm" co-operation of this country and he was glad to have that. "The continued energetic co-operation of Canada," he said, "was something that the British people treasure."

Mr. Morrison also assured the press that Britain would have a continuing interest in Canada's food products, which was good news for our farmers and fishermen.

UNITED NATIONS MEET
Hon. Brooke Claxton, Minister of National Health and Welfare, has left Ottawa on his mission as the Canadian member of the Economic and Social Council of the United Nations.

The Council opens its second session in New York.

Six commissions set up by the Economic and Social Council at its session in London in January and February of this year have completed preparations for the meeting of the commission.

These commissions are: the economic and employment of refugees set up by which Dr. W. A. Mackintosh is chairman; the commission on human rights; the sub-commission on the status of women; the temporary transport and communications committee; the temporary social committee; and the statistical commission.

A special committee on refugees set up by the economic and social council is also meeting in London and is expected to recommend to the council machinery for dealing with the problems of refugees.

These appear to be the outstanding difficulties of the world today.

Echoes of the adjourned Dominion-Provincial contest are still heard from all parts of Canada. Premier Douglas of Saskatchewan still thinks that "something might yet be salvaged" if enough votes protected the death-bed and asked by Saskatchewan to urge that Federal Government

C.P.R. Tutors Chairs for Comfort

SEATTLE, Wash., May 28 (AP)—

Canadian Pacific Railway is installing in 35 new air-conditioned passenger coaches on which delivery is expected early in 1947.

Built to "give" with body curves and distribute weight properly the new chairs are sometimes referred to as the Houston chair, because of research done by Dr. Ernest Houston of Harvard University whose experts took the measurements of the better than the thousand volunteers in railway terminals of two of America's largest cities. For shoe-shedders an adjustable footrest is provided.

(Inset) It having been determined women like to ride in stocking feet as they nap. Cost of the new chairs alone will be more than \$300,000, with this figure being part of a four million-dollar appropriation, the first large passenger equipment order it has been possible to make since 1919, with double bedroom-restaurant cars and express-luggage cars as well as passenger coaches included in the appropriation. The Canadian Pacific is the first railway in the Dominion to approve the new chairs and it will further pioneer in the 35 new coaches with the installation of the first electrically refrigerated water coolers on a Canadian road.

Winnipeg

Canada's Wheat Acreage

IN VIEW OF THE PRESENT critical world food shortage, this year's harvest takes on the greatest importance, for upon its success or failure depend many thousands of human lives. So far, Canada's record in meeting commitments for sending food abroad has been satisfactory, but in meeting these commitments usual food reserves and especially reserves of wheat have been considerably depleted. A great deal will depend on the results of Canada's grain harvest this year, and interest in crop prospects will be much greater than usual, both here and abroad. Crop failures last year in Europe and some other parts of the world are partly responsible for the present desperate food situation and any factor which may contribute to a poor harvest this year will be viewed with concern in all quarters.

Prairie Acreage To Be Increased

The Dominion Bureau of Statistics recently issued a report on the probable acreage to be sown in wheat in Canada this year. The report indicated that approximately 3,000,000 more acres of wheat will be harvested this year than in 1946. This would raise in the whole of Canada from 25,414,109, which was the number of acres sown last year, to 28,414,109. These figures were compiled from information received from farmers before the end of April and it was pointed out in the report that due to local conditions in some parts of the country there might be a slight rise or fall in the actual amount of land seeded. The expected increase in wheat acreage in the Prairie Provinces was given as 2,800,000, which was greater than the net increase for the whole of Canada. This was explained by the fact that there is a concurrent decrease of 230,000 acres in fall seeding in Ontario.

Almost Equals Record Year

The report further draws attention to the fact that should the intended increase be realized Canada's wheat acreage in 1948 will be almost equal to that of 1939 when 28,726,000 acres were sown. It would, however, be less than the 28,726,000 acres in wheat. Indications in regard to other grain crops show that barley acreage for the whole of Canada will be down eight per cent. from last year, while flax will be down about one per cent. Summerfallow acreage is expected to be 18,724,000 as compared to 18,809,000 last year. These figures show that if conditions are favourable Canada should have sufficient wheat to continue to contribute generously to the world food supply. Because agriculture is probably Canada's greatest basic industry the results of the harvest have always been a subject of wide interest, but from the point of view of human needs the 1948 crop may be the most important one in our history.

Played Chief Role

Lord Dowding Led R.A.F. Crews In Decisive Battle Of Britain
It was Air Chief Marshal Lord Dowding, who attained his 64th birthday recently, who played the chief role, and a dramatic one it was, in the most crucial of all the battles of the last war. Lord Dowding approved and inspired the design of the British eight-machine-gun fighters that were, under Providence, the vital weapons which enabled the gallant few to whom so many owe much to defeat the Luftwaffe's mass attack on Great Britain, a London correspondent recalls. Not only so, but he thought out the strategy, planned the tactics, trained the crews, and led them in the decisive Battle of Britain. His affection for these R.A.F. lads who married those Spitfires and Hurricanes, and who shot down the invaders over English meadows, fighting against tremendous odds with indomitable pluck and incredible skill, passes all description.

GEMS OF THOUGHT

HOME

He is the hope, he is king or peasant, who finds peace in his home.—Goethe.

But every house where Love abides And Friendship is a guest, Is surely home, and home, sweet home; For there the heart can rest.—Henry W. Dyke.

Home is the dearest spot on earth, and it should be the centre, though not the boundary, of the affections.—Mary Baker Eddy.

No genuine observer can decide otherwise than that the homes of a nation are the bulwark of personal and national safety.—Holladay.

The first indication of domestic happiness is the love of one's home.—Montaigne.

He that doth live at home, and learns to know God and himself, needeth no farther go.—Christopher Harvey.

To Feel Right — Eat Right!

Scientific Experiment

Nobel Prize Winner Plans To Change Coal Into Diamonds

Frederick Joliot-Curie, French Nobel prize winner, has proposed a "peaceful" atomic energy experiment to see whether coal could be changed into diamonds.

Joliot-Curie, who is France's high commissioner for atomic research, said the experiment could be conducted by drilling a tunnel into a granite mountain and filling it with coal. He said the tunnel could be sealed with an atom bomb inside—and then explode by remote control. Scientists, he said, could then observe the effect of the terrific heat and note any structural changes in the mineral.

INJURIES PROVE FATAL.—Injuries received when a Detroit automobile collided with a horse-drawn wagon during a hayride party on the outskirts of Windsor, Ont., have proven fatal to Stella Martin. Miss Martin's neck was broken in the accident.

United Europe

Mr. Churchill's Pica 'Not Likely To Be Answered'

Mr. Churchill's plea for a "United States of Europe"—a doctrine preached by the late Aristotle Onassis—has not been answered in our time. Man has come a long way from the days of tribal chief, he has not yet reached the stage where races, nationalities, castes and creeds can be merged into a political whole.

The United States is often pointed to as an example of what is possible in the way of unity. But when the United States—once held to be preserved at the cost of a frightful civil war—was achieved through the powerful cement of a common language, through people with basic beliefs in common institutions. There is no such cement in Europe, with its multiplicity of languages, its racial animosities rooted in centuries, its conflicting political philosophies.

Mr. Churchill's ideal does credit to his heart; preached by him with a deep sense of history, it also challenges thought. Yet it is not possible to look over the world today, with all its wrath, and hold that the ideal will be realized in our day. A century hence, perhaps, it will be different, with men understanding that only by forgetting things that came out of the cave can civilization go on; for the moment the best of unity within our reach would seem to be the United Nations, many though that institution is showing itself to be—St. Catherine's Standard.

Valuable Pictures

Taken To U.S. For Safe Keeping Are Asked To Be Returned

Ninety-five art authorities have urged President Truman and acting Secretary of State Dean Acheson to send back 200 art market-pieces removed to the United States from Germany last December.

A resolution, adopted public by Juliana Force, director of the Whitney Museum, and Ford Mordkern, director of the Rock collection, said:

"Two hundred important valuable pictures have been removed from Germany and sent to this country on the still unstable ground of ensuring their safety. . . This action cannot be justified on the technical, political or moral grounds."

Coffee, chocolate and tea were among the first products advertised in newspapers.

HEALTH 'SANATORIA'

Atomic Ovens Could Be Made Usable According To Scientists

The atomic ovens, or piles as scientists call them, because they built is mainly a pile of graphite bricks, are likely to become health sanatoria.

All that is necessary to make their rays available for treatment of disease is to cut part through the mass of concrete walls shielding the piles at Hanford, Washington, and arrange similar openings in the piles of smaller dimensions at Oak Ridge, Tenn., Ardmore, Ill., and elsewhere.

The methods are told in the bulletin of the atomic scientists of Chicago. The Hanford piles are great cubes of graphite surrounded and covered by walls of concrete about three feet thick. These walls confine radio-active rays equal to hundreds of times of range, and neutron rays equal to thousands of great cyclotrons.

The rays issuing through a port cut in a wall could be fatal to anyone standing at the port just as were the flash radio-active rays that killed Japanese at Hiroshima and Nagasaki. Similarly the rays issuing through a single port would be more intense than those that have been available in all the hospitals of the world, if all could be placed together.

This true death ray would be made harmless by what the radio-logic call filters. These are plates of steel which absorb the most energetic materials that filter the energies toward the dosage that physicians would want to use.

Many patients could be treated at one time, since the quantity and intensity of rays is sufficient to fill many channels, one for each person. In this way, for the first time, the rays of radon and X-rays would be made really cheap. And for the first time there would be a large supply of neutron rays, not given off by radium.

For Man And Beast

Vitamin Pills Stashed By Husky Dog On Muskox Expedition

Mukluk, the lean, hungry husky who gobbled 15,000 vitamin pills during the recent Muskox Arctic expedition, is doing fine "thank you" and so is the rest of the expedition. It is a new assurance to his gray and white coat.

A defense headquarters spokesman gave the first official version as to why Mukluk got next to the vitamin pills. He said the husky, who was a new assurance to his gray and white coat.

SELECTED RECIPES

GRAPE-NUITS PUFF PUDDING

1 teaspoon orange liquid
3 tablespoons butter
1/2 cup sugar
2 egg yolks, well beaten
3 tablespoons lemon juice
1/2 cup raisins
2 tablespoons Grape-Nuts
1 cup milk

Add lemon juice to butter; add sugar gradually, creaming well; add egg yolks and beat thoroughly; then add lemon juice. Add flour, Grape-Nuts, and milk, mixing well. Fold in egg whites. Turn into greased baking dish and place in pan of hot water. Bake in slow oven (325 deg. F.) 1 hour and 15 minutes. When done, pudding will have sponge crust on top and custard below. Serve cold with cream. Makes six servings.

Made-Over Clothes

Small Part Of Princess Elizabeth's Wardrobe Is New

The London Daily Mail, commenting on the costume of the Princess Elizabeth when she attended the Hurd Park races with the King recently, stated that she wore the same serge coat, blue hat and veil. It goes on to state that the Princess suffers from the lack of making ration coupons, as does everyone else. She possesses few clothes specialties made for her. Most of her wardrobe was originally her mother's and has been altered to suit her.

RADAR GREAT HELP

Radars aids used on airborne operations have helped the R.A.F. to deliver twenty-one million newspapers and nearly fifteen hundred tons of mail and other freight to British forces in Europe in the last six months. In the past, the bulky bundles of newspapers or mail have been dropped "blind" with perfect accuracy by radar apparatus.

ANCIENT DISCOVERY

CANNESBURG, Ky., has been declared a Roman baby, which died between 1000 and 1900 years ago, has been unearthed here.

War-time Secret

'Leader Cable' Guided Ships Into Harbor In Stormy Weather

Another wartime secret has been disclosed—"leader cable" to guide ships home.

It consisted of a single-core insulated cable laid on the seabed which shipping was intended to follow. Low frequency alternating current was fed through the cable from shore. The current generated a magnetic field in and above the sea which would be detected by surface ships fitted with suitable apparatus.

From the nature of the signals it was possible to work out the position of the ship in relation to the cable and thus make any steering corrections necessary to keep the ship on a course directly above the cable.

It aided ships moving into harbors in thick weather.

FAMED GLASSWORKER

Frederick F. Duerrlein, 82, retired glassworker, who claimed to have blown the first electric light bulb ordered from the Corning Glass Works by Thomas A. Edison, died after a short illness. An employee of the glass works for 40 years prior to his retirement in 1936. Duerrlein said he blew the first test bulb for Edison in 1879, and the inventor then ordered 150 bulbs.

Rural Electrification

ELECTRICAL POWER, which is a key factor in modern industrial development, and essential to so many of the services enjoyed by those who live in urban centres, has been slow to penetrate to the rural areas. Before the war, considerable progress was being made in extending rural electrification in Canada, but in recent years shortage of material and labour, and the need for conserving the sources of power, curtailed this progress. It is to be hoped that as soon as conditions permit such a program to be resumed, that electrical power will be made available to a high percentage of the farms in this country. A recent survey showed that in 1941, 7.3 per cent. of the farms in Manitoba were served with electricity. The figures for other Western provinces in the same year were: Saskatchewan, 4.7 per cent.; Alberta, 5.4 per cent.; and British Columbia, 25.8 per cent. For Ontario the percentage was 37; and for Quebec 23.3.

Would Improve Farm Conditions

The subject of rural electrification is dealt with in an interesting manner in a recent article published by the Royal Bank of Canada. In this article attention is drawn to the fact that the higher percentage of rural electrification shown for some provinces could be accounted for by the fact that they have smaller farms, situated more closely together, and consequently easier to serve. In sparsely settled districts, or those cut off from normal service by physical barriers, self-contained generating units commonly provide electricity for the farms. A recent survey in Alberta showed the average investment in plants operated by fuel and wind was four hundred dollars, while an average of seven hundred dollars was invested in combination type plants. By whatever means electrical power may be obtained it is apparent that it can do much to improve working and living conditions on the farm.

Would Reduce Manual Work

New uses for electricity are constantly being discovered, and many of these discoveries are now being applied to the needs of agriculture. In Britain, rural electrification was extended during the war, due to the urgent necessity of increasing agricultural output with a minimum supply of farm labour. There many means were devised for using electricity to speed up farm work and drastically reduce the amount of manual labour required. The United States Rural Electrification Administration has reported that there are more than three hundred uses for electricity on farms, adding that a farm may be considered "a miniature factory, as well as a residence." Electricity has long been used to simplify work and increase efficiency in industry and it is apparent that it can be used just as effectively to shorten hours of labour and generally improve living and working conditions on the farm. The subject of increased rural electrification should receive the interest and support of every part of the community.

ITCH CHECKED

The quick relief from itching caused by eczema, scabies, hives, welts, rashes and other itchy skin conditions. Mentholatum, the famous "Mentholatum" ointment, is the only relief for itchy skin. It soothes, cools and quickly soothes the itchy skin. It is the only relief for itchy skin. It soothes, cools and quickly soothes the itchy skin.

The game of checkers has been traced back 4,000 years. Chess is 2,000 years older than that.

SCENT BASIS

Perfume manufacturers may soon be using the glands of Saskatchewan muskrat as a basis for their fine scents. Fred Mullins of the Provincial Natural Resources Branch, said negotiations were being made with a New York firm which offered market prices of \$5 a quart if enough glands are obtainable.

Windows will sparkle if some vinegar is added to the water.

Price Control And Rationing Information

Q—I have heard several rumors to the effect that sugar is going to be more expensive in Canada. Is this true?

A—No, sugar will not be raised in price in Canada. The Prices Board has lately issued a statement to this effect.

Q—I have recently arrived from England to join my soldier husband. How do I obtain my ration book?

A—Please apply to any local ration board, bringing with you proper credentials and they will arrange for a ration book to be issued to you.

Q—Is it necessary to change the address on a ration book when a person moves?

A—The address on the ration books should be kept up to date in case the books are lost.

Q—Has the Wartime Prices and Trade Board any control over store deliveries?

A—At one time there was a Board regulation which stated that an order must amount to \$1 or more otherwise it could not be delivered, but that regulation is no longer in effect. It is entirely up to each individual store to make their own arrangements about deliveries.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your retail prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Valuable Souvenir

Envelope Addressed To Franklin Roosevelt Sells For \$100

Eight envelopes addressed to Franklin D. Roosevelt and mailed from the royal train during the North American visit of the King and Queen in 1939 sold for \$100 at a public auction of the first part of the late President's stamp collection. Only one envelope, however, actually was mailed in Canada, although all items were posted from the royal train. Another item from Canada on the block was a first flight from Vancouver to Seattle, Wash., Feb. 17, 1919. It sold for \$50.

The crocodile has the most highly developed circulatory system among reptiles.

Chapped Skin

Mentholatum, soothes, promotes healing, brings quick relief to chapped skin. Also for chafes, cuts and bruises. Mentholatum, soothes, promotes healing, brings quick relief to chapped skin. Also for chafes, cuts and bruises.

LAND SETTLEMENT

Manitoba Has Launched A Major Project For Veterans
The Manitoba government has launched a major land settlement project for veterans in Manitoba intended to open up 40,000 acres of new land for farming in the Birch River territory within three years. It was announced by Provincial Minister and Natural Resources Minister J. S. McDermid.

The initial expenditure in 1946 will be \$100,000, he said, adding that the development "will be one of the most far-sighted land settlement schemes ever undertaken in Manitoba."

Surveys are now in the field at Birch River, about 235 miles northwest of Winnipeg, and present plans call for 10,000 acres to be ready for soldier settlers this year. The project will supply about 200 new quarter and half section farms.

Saskatchewan Oil

Another Oil Well Is Drilled In The Lloydminster Area
Another successful oil well—the first of 1946—has been drilled in the Lloydminster, Sask., area, Natural Resources Minister J. L. Phillips revealed recently. Oil was struck at a depth of 2,562 feet.

The well is the eighth in the area owned by Community Services, Ltd. Mr. Phillips said the company plans to drill nine more wells in all three during 1946. At present, this company has three oil wells in production at Lloydminster, while its two gas wells have been tapped and the installation of a pipeline for operation.

In the Unity gas district, Bala Petroleum, Ltd., will begin drilling operations of 40 new wells on April 1. Last year the company put down ten wells in this district.

Story Teller

Robert Louis Stevenson Made An Early Start
It was difficult to guess what writer Robert Louis Stevenson was when he was a child.

"Rickett, you go in that corner for being naughty," ordered the nurse.

The embryo author complied. After a time, the nurse decided the boy had been sufficiently chastised and said: "You may come away from the corner now, if you promise to be good."

"Shh, don't bother me," said the five-year-old Stevenson. "I'm telling myself a story."—Magazine Digest.

GEMS OF THOUGHT

MEDITATION

Meditation is the nurse of thought, and thought the food for meditation.

—C. Simmons.

Meditation is that exercise of the mind by which it recalls a known truth, as some kind of creature does their food, to be reminded upon till all the valuable parts be extracted.

—Bp. George Herbert.

I used to go six miles to hear a sermon, than to spend one hour of an hour in meditation upon it when I came home.

It is not he that reads most, but he that meditates most on divine truth, that will prove the choicest, wisest, strongest Christian. —Bp. Joseph Hall.

Thought must be made better, and human life more fruitful, for the divine energy to move it onward and upward.—Mary Baker Eddy.

Happy the heart that keeps its twilight hour, And, in the depths of heavenly peace reclined, Loves to commune with thoughts of tender power.—Mary Baker Eddy.

Thoughts that ascend, like angels beautiful. A shining Jacob's-ladder of the mind! —Paul Hamilton Hayne.

RECIPES

Cauliflower With Rag Sauce

- 1 medium-sized cauliflower
- 2 tablespoons butter
- 2 tablespoons flour
- 1 teaspoon salt
- dash pepper
- 2 teaspoons melted butter
- 1 teaspoon Worcestershire sauce
- cup milk
- 2 hard cooked eggs, coarsely chopped
- 1 cup corn flakes

Remove leaves and stalk of cauliflower. Soak in salted water about 30 minutes; drain. Cook in boiling salted water about 20 minutes until tender. Drain carefully; put in to ground baking dish. Melt butter; stir in flour, salt, pepper and Worcestershire sauce. Gradually add milk. Cook until thickened, stirring constantly. Fold in eggs, corn, cauliflower and buttered corn flakes crumbs. Bake in moderate oven (375 deg. F.) about 20 minutes or until crumbs are browned. Yield: 4 - 6 servings.

Tea was expensive in England even into the last quarter of the eighteenth century. The poor often bought the used tea leaves of the rich.

Watch Out
For Sore Throat, Sore Head, Colds!

Head Colds!

Relieve Distress

Never again head colds! They can cause much suffering. Watch out for them. Use V-A-T-R-O-NOL. It relieves, soothes, reduces swelling, and keeps the throat open. Try it. It also helps prevent colds. Use it in time. It will keep you healthy.

Don't Doze!

Keep Regular... Naturally!

Kelly's ALL-BRAIN
For Constipation

SCIENTIFIC DISCOVERIES
British scientists have devised a new method of softening water, using certain minerals called lime and soda. These substances take the lime and magnesium out of water and replace them by harmless sodium compounds. A grout has also been found to reclaim the nicotine lost in tobacco curing and the pectin from citrus fruits waste.

Nearly all snowflakes are six sided, as are honey bees' cells.

THE NEWEST PROBLEM
The problem is how to teach a sheep how high is two inches. The board of public works at Los Angeles has approved a contract for a herd to graze on nearby Baldwin Hills—grass-planted to prevent erosion—providing the sheep don't nibble the grass shorter than two inches.

In the early history of printing only black ink was used. When a color was wanted for initials or ornamentation, it was hand-lettered.

How You Can Get Quick Relief From Sore, Painful Piles

Most people seem to think the only way to get relief from hemorrhoids is to use a lot of medicine. But you can get quick relief from hemorrhoids by using the only medicine that has been found to be so effective. It is the only medicine that has been found to be so effective. It is the only medicine that has been found to be so effective.

Senator Gershaw Writes

THE FLAG
It's only a small bit of bunting,

It's only an old colored rag,
Yet thousands have died in its honor,
And shed their best blood for the flag,
There is an instinct in the human
race that delights in the flying of
flags. All down through the ages
every nation has had an emblem
the rallying sign of those loyal to

that nation.
At the time of the Exodus the
Israelites had their distinctive em-
blems and the Book of Numbers re-
lates how Moses directed that in their
journey "Every man of the children
of Israel shall pitch by his own
standard with the ensign of his
father's house."

In latter times there were few parts
of Europe not acquainted with the
Eagles of the Roman legions. They
were set up in many subjugated states
as a sign of All Conquering Power
of the Mighty Empire. The Cross,
which was the emblem of the death of
Christ, has become the signal and
glory of Christian nations.

Each color on a flag recalls
something in history or perpetuates
the memory of a great event. These
stories are told anew as the flag,
is unfolded and floats in the breeze,
so long as the pride of race exists
the waving of the flag that is its
symbol of that race will stir the
emotions and bring forth the cheers.

Canadians are not a demonstrative
people yet when it became known
that a national flag was to be chosen
there were 2409 sample flags sent in
to the committee many of them
beautiful in design and suitably com-
bining colors and emblems.

Perhaps there is no flag that has
history more plainly written upon
its folds than has the Union Jack. In
the earliest days of chivalry, long
before the Norman Conquest of Eng-
land, both knights on horseback and
men on foot wore a surcoat or
"Jaques" extending over their
bodies from neck to thigh. In the 11th
and 12th century when men from
Christian nations went to rescue
Jerusalem and the Holy Land from
the rule of the Mohammedans the
warrior pilgrims wore crosses upon
the "Jaques". They were thus called
Crusaders. This mark of distinction
was necessary because faces were
hidden from sight by helmets.

The Crusaders from England wore
the Red Cross of St. George or the
Scottish Cross of St. Andrews were
raised on a staff at the bow of a ship

to proclaim the nationality of those
on board. The combination of the
Cross of England, Scotland and Ire-
land at successive periods of history
was the origin of the Union Jack of
the British Nation.

The English had a white flag with
plain Red Cross.

The Scottish had blue color with a
white cross.

The Irish had Red cross on white.
To hoist false colors was dishonor-
able. A flag at half-mast is a sign
of mourning. The lowering of a flag
is a sign of surrender. Raising of a
victor's flag is a sign of capture. To
hoist a flag of one nation under an-
other is to show disrespect.

The 2409 flags sent in were all dis-
played in a large room. Each flag
was given a number and placed on a
panel. The members of the com-
mittee were asked to choose five flags
as their five first choices. When all
the choices were counted there were
78 flags that had received one or
more votes and the remainder were
all set aside. A long debate then took
place. One member pointed out that
of the 2409 flags, 1911 had the Maple
Leaf on! The Maple Leaf should be
on the flag chosen. There were 303
flags with the Union Jack on, so it
would seem to be popular. But 184
had stars, 184 had the fleur-de-lis,
116 and the beaver, 49 had the crown,
22 had the cross, 15 had the ship,
and 42 had horizontal or vertical bars.
Of course, the committee was not
bound to choose any of the flags put
in, yet the Maple Leaf and the Union
Jack were the most popular with these
sending flags in.

E. W. GERSHAW.

The administration of the Farm
Improvement Loan Act has arranged
for loans obtainable through the
chartered banks and guaranteed in
part by the Dominion Government.
This plan obviously has much to
offer farmers proof of which is the
report that over \$2,000,000 have al-
ready been loaned for the purchase
of implements which will help in-
crease Canadian farm production.

WARNING TO FARMERS

YOU MAY BE DIRECTLY AFFECTED
BY COAL STRIKES

BECAUSE—(a) Eastern industrial consumers
may be forced to use Alberta
supplies intended for local
use next winter.

(b) Insufficient storage facilities
prevent further increase of
reserve stocks by distributors.

(c) Consumer stocks are already
depleted beyond recovery—
winter shortage inevitable.

CONTACT YOUR LOCAL U.G.G. AGENT

New...Easy...Low Cost ROOF PROTECTION

with IMPERIAL

ROOF PUTTY FLUX

Here's a new product from Imperial Oil Limited that
saves money and serves many useful purposes around
the farm! Imperial Roof Putty Flux is the ideal coating
for metal or bare top felt roofs... makes them water-
proof, protects against the weathering action of the
sun's rays, ice and snow. Made from a high-grade
asphalt base, Putty Flux is useful, too, for coating the
inside of cisterns, water troughs and tanks to prevent
leakage.

Easily applied with a roofer's brush, or by hand paint
brush on small areas. Comes ready to use, no heating
required in normal summer weather. Covers 100-150
square feet per Imperial gallon.

For those Spring "fix up" and repair jobs, ask your
Imperial Oil Agent about the new Roof Putty Flux in
the handy, economical 5-gallon drum.

OUR COMPLETE SHORT STORY—LIGHT OF DAWN

—By—**MATTHEW F. CHRISTOPHER**

Copyright
Wheeler Newspaper Syndicate

They passed a farmhouse. A pale yellow light filtered through a window, touched a muddy path filled with rain that gushed in a sweeping curve into the ditch. The thunder spoke loud and heavily.

"Scared?" Jim asked. He imagined he saw the soft places of her face in the deep shadow. Jane was sitting apart from him, moving straight ahead of her, her head going gently with the easy sway of the car.

She looked at him, and her green eyes were like raindrops, clear and pure. "No. Why should I be?"

He shrugged. "I just thought you might be. After all, that rain, and this noise—"

The motor coughed, stalled and stopped, and he knew the gas gauge reading half full, that this time the battery was really dead.

He twisted the ignition key. The windshield flamed with water, and the rain on the roof was like the noise of a dozen pounding woodpeckers. He sighed dizzily. "Well, here we are. Stranded. I guess my luck is with me tonight."

He could hardly see her through the veil of darkness she hung between them like a barrier. But what he was unable to see, he could feel in his mind, and he saw the color of her hair that was like wine, and he thought of her warmth, and he knew he desired so much to share of it.

"You just think you know what you are," he said. "You're not sure your mind that you are that way, and you don't want anybody to change it."

Even in the darkness he could visualize that hardness about him. But he knew it was what she was creating herself. "It's in your mind," he said.

She shook her head. Her voice was low, and as sweet as he remembered it before she had left that memorable day.

"It's no use, Jimmie. I would never make you a good wife. Your life would be miserable."

His lips tightened. "You're talking foolishly," he said. "In circles."

"I'm not," she said. "I know what I'm saying. I know, because I've been through it. I've seen the way and what it did to the people. I had to live with them. I had to write about them, after it was over. And the suffering—" She paused. "I could never stand it again. You don't know. You were here."

His voice was husky. "No. Not always."

She stared at him. He hadn't told her, and he knew she'd be surprised. He nodded. "After you left, I joined. They sent me to the Pacific."

DUNDURN CAMP RECEIVE AWARDS

At One Time Centre of Military Activity in Saskatchewan

No longer does Dundurn's rolling countryside reverberate to the shouting of commands and the sharp rattle of guns.

The once mighty Dundurn military camp, through which thousands of soldiers passed during the war years, is now virtually a "ghost" camp—its wartime role completed. An occasional soldier can now be shuffling down a street, between long rows of huts, that until a few weeks ago abated with activity, in keeping with the Canadian Army's demobilization. Dundurn camp has dwindled to a strength of approximately 250 officers and men.

Dundurn's camp wartime history really began in the summer of 1944 when it reached a one-time peak of 10,000 men, most of whom were under canvas. At the time the camp was the centre of military activity in Saskatchewan, busy training newly mobilized units, 30-day call-ups and reserve army troops at summer camps.

Basic training centres which later moved to Prince Albert and Maple Creek, their origin at Dundurn, came to an end. Going full swing at the same time was a Machine Gun School, which continued at Dundurn as the main activity until the camp became the only Reconnaissance Training Centre in Canada.

For more than two years the Canadian Army sharpened its "eyes and ears" which continued at Dundurn. Troops became known as "Dundurn troops" because of the trucks, armoured cars and motor cycles roared over the sand dunes to train the "fast moving reconnaissance" troops. "Recon men" the role of spying on the enemy in no-man's land, strength, disposition, morale, and the information possible about the enemy's troops, strength, disposition, morale.

Shortly after the disbandment of the 27th Reconnaissance Battalion in November 1944, two infantry training battalions, Nos. 10 and 12, were organized at Dundurn.

Canadian Infantry Training Centre was moved from Camrose, Alta. No. 13 is the main training centre, and its present officer commanding, Major Harry Evans, formerly of Winnipeg, has the job of tidying up the administrative ends as activities gradually come to a close. No. 12 disbanded late in 1945 while No. 13 continued until spring.

Dundurn Military Camp emerges from the war three times the size it was at war's outbreak, completely reoriented and with a water and sewage system. Main difficulty in the early stages of the war was the job of converting the estate from a summer camp to an year-around training centre.

Water was a problem. The lack of water which was solved by finding a new well from which pumped 200 gallons a minute into the 10,000 gallon water tower, the camp which can be seen from the hills, the tower is 132 feet high. The camp's old water tower is on Dundurn, where are the Legion, accounts officers, and Bill Reid, C. of C. supervisor. Bill Reid, of Saskatoon and his wife, have been at the camp continuously since 1940 while Jim Dundurn has put in four straight years.

Dundurn camp's immediate role is to train new recruits. Here, certainly, it will come to life again when it reverts back to its peacetime duty of accounting every man, woman and child, and the rear of army units at summer camps. Once again its parade squares will sound to music the drums, and the roar of motors and the sound of shell-fire will again be heard echoing through the hills.

Outstandingly Good

TEA

SMILE AWHILE

"I see you have been fishing. Catch anything?"

"Yes, two."

"Good, what were they?"

"The 730, there, and the 315."

First golfer—"I'm terribly off my game today."

Second golfer—"Are you? By the way, what is your game?"

A farmer wrote to a rural paper to ask "how long cows should be milked."

"Why, the same as short cows, of course," advised the editor.

"I shouldn't be telling her you're unworthy of her."

"No? Why not?"

"Let it come to her as a surprise."

Candidate: "How did you like my speech on the agricultural problem?"

Farmer: "I wasn't bad, but a day's rain would do a heap more good."

"Aren't people funny?"

"Yes. If you tell a man that there are 270,678,354 stars in the sky, he'll believe you. But if a sign says 'Fresh Paint', that same man has to make a personal investigation."

Shopowner: "That customer was hanging round for a long time. What did he want to see?"

Pat assistant: ("You're back, sir."

Pat knocked on Mike's back door and asked Mrs. Mike if Mike were home.

"Of course, he's home," said Mrs. Mike. "Can't you see his shirt on the line?"

There is one thing I do not know. "Boss, that I've no illusions. I do not know how long he jumps when he jumps to conclusions."

"My, what beautiful hands you've got! Tell me, after you've cut your nails, do you file them?" asked a chorus girl.

"Oh, no," she replied. "I type myself, I throw them away."

"How many times I shall bow!" said the novice entertainer at the battalion variety show.

How said the stage manager. "No bowing for you, mate; you'll have to duck."

MAY HAVE CREAM

ROMSEY, England. — R. A. Pepper, chief regional marketing officer of the milk marketing board there, said it may be possible to supply cream in a year's time.

OFF TO HOLLYWOOD—Daughter of Ronald Cloutier, the King's printer, and Mrs. Cloutier of Ottawa, Miss Suzanne Cloutier is shown at Plands airport before leaving by plane for Hollywood, where she is to make a screen test. The lovely Ottawa girl is under option to Warner Brothers.

FLAG FAVORITES—Two favorites in the final selection of a Canadian flag are shown. The Union Jack in the canton and maple leaf in the fly, (top), is leading. Quebec M.P.'s favor other.

INSINUATING BOMB

An insinuating bomb—or as its inventors describe it—a simple, hand-operated, fool-proof "bug blitzer" is the ultimate weapon of the ex-service personnel, trained civilian producers. Three thousand air force officers have produced the missile from surplus shell casings and a mixture of dynamite, DDT, pyrethrum and from liquid gas. They are E. J. Black, Harry Clappison and Dr. J. H. Bail.

Want World Trade Work in Scotland

United Kingdom, Canada And United States Are Working Together

HALIFAX—Finance Minister J. H. Macdonald said that a "really tremendous attempt is being made" by the United Kingdom, Canada and the United States to put into operation what might be called a liberal system of international trade.

Speaking at the annual dinner of the Nova Scotia Barriers' Society, he said strong measures would be needed to put the United Kingdom back on its feet so it could resume its pre-war position in world trade.

Country Has Plenty Of Jobs Says Secretary Of State

J. Westwood, Secretary of State for Scotland, speaking at the annual convention of the Royal Burghs of Scotland in Edinburgh, said there were going to be plenty of jobs in Scotland.

No other part of Britain had more thoroughly prepared itself for the future.

Mr. Westwood said he believed that people were beginning to "realize that there was a future for this country of ours." That counted for a great deal. After the last war a good many Scots folk felt that the old country had no further use for them.

"Developments either completed or in process of completion will result work for about 85,000 people," he continued Mr. Westwood—Edinburgh Scotsman.

Longest Milk Route

Covers 1,200 Miles From Tupper Creek, B.C., To Yukon

What is probably the longest milk route in the world has been hailed back on the Alaska highway. Hauled 1,200 miles in refrigerator trucks from farms around Tupper Creek, B.C., it is delivered to Yukon residents and sells for 25 cents a quart.

Alaska deliveries may not be as punctual as in city routes the day and night hauls bring the milk into town daily regularly. The truckers haul meat and vegetables.

Three quarters of the world is ocean.

Sugarless BUT Sweet

MAGIC Food Powder Cake

1 1/2 c. shortening 2 1/2 cup. Magic Baking
1 c. cornmeal 1/2 cup. sugar
1/2 c. butter 1/2 cup. vanilla extract
2 eggs, well beaten 1/2 cup. lemon extract
1/2 c. oil-free milk 1/2 cup. vanilla extract

1. Beat dry ingredients together. 2. Add wet ingredients. 3. Mix thoroughly. 4. Bake in 10" x 10" pan for 30 minutes. 5. Cool. 6. Sprinkle with powdered sugar.

A PICKNICKING WE WILL GO!—The first picnic of the season, whether it is on the porch, or beside a winding brook, is always an especially exciting event—and it usually occurs around this time of the year.

Laughter and gaiety surrounds the occasion while fathers build fires, mothers do the cooking, and children gather wild flowers.

As far as the eating goes, of course, there will be meat patties and soft buns, vegetable salad, olives, pickles and soda pop.

"Well, it's nearly time for this big outing in your family, so you'll be glad to have this recipe for Branburgers—a variation of the hamburger, and a recipe that adds to the flavor and subtracts from the amount of meat needed to put patties to go around. You can easily make 10 patties from only one pound of ground beef—a real aid to the meat problem!"

BRANBURGERS

1 egg 1 1/2 cups milk
1 1/2 tablespoons oil 1 1/2 cups milk
1 1/2 tablespoons oil 1 1/2 cups milk
1 1/2 tablespoons oil 1 1/2 cups milk

Beat egg, add salt, pepper, onion, parsley, milk and oil. Let meat until moist with milk. Add beef and mix thoroughly. Cut slices of onion lengthwise into two strips. Arrange two strips bacon cross-wise on waxed paper. Mold generous tablespoon of meat mixture into patty and place on bacon intersection. Bring strips together on top of patty, securing with toothpick. Bake in hot oven (350 deg. F.) about 30 minutes or broil about 20 minutes.

Remove Branburgers from oven. Add milk and seasonings to drippings. Thicken slightly to make gravy. Yield: 5 servings (10 patties).

We're thinking about laws to control strikes—laws to control employ- ment. What about a love to control strikes—laws to control employ- people?

I Own a Beauty Parlor

Yes, ma'am!... complete with everything possible to help keep you young. Young in appearance, without the signs of back-breaking work and long hours of household chores that used to show on a woman's face... and hands. Young in spirit, too, so that you really enjoy the pleasures of life... not only because you are able to, but also because you have the time to do so.

No doubt you're busy now. Yes, I'm busy at home and the office. But I'm not busy with the things that cause many of them didn't even start.

Naturally beauty parlors must have "operators", as they are known to the trade, and you have the most efficient, hard-working operator, who takes no holidays—not even Sundays, that's possible to get. Lightning-fast, ready the instant wanted—say, I'm blushing, that's me I'm talking about.

Guess I'd better stop or you'll be feeling tired just from thinking about all the hard work you'd have to do if you didn't have me. It's a horrible thought isn't it?

CARD OF THANKS

Mr. and Mrs. D. Robinson desire to express their sincere appreciation to their friends for their acts of kindness during their recent sad bereavement.

Soldiers trained to fight may fight for the wrong thing when they come home, unless they find us fighting for the right one.

When a person sounds off, that is just how he does sound-off.

Town & District

Mrs. Campbell Evans of the Blackfoot Reserve, left for Toronto last week on an extended visit to her daughter Marjorie.

Mr. and Mrs. T. Jones have returned home from a holiday spent at Vancouver.

Mrs. Cecil Lyons and family of Coronation, Alberta visited her sisters Mrs. A. Wilson and Mrs. Bob Brown over the holiday.

Mr. and Mrs. Jack Webb and family of Calgary visited their many friends in town over the holiday.

Mr. and Mrs. Horn, Mr. and Mrs. A. F. MacCallum and Miss Donna Jean MacCallum attended the wedding of Mr. and Mrs. Horn's daughter in Calgary last Saturday.

Sgt. W. MacCallum of Calgary spent the 24th in town visiting his parents.

Miss Lena Collins of Calgary spent the weekend with her visiting car parents Mr. and Mrs. T. Collins.

Bob Dobson of Calgary spent the holiday in town visiting friends in the district.

A shower in honor of Mrs. W. Parrott (nee Miss U. Hunter) was given at the home of Mrs. W. Schmidt on afternoon last week at which a large number of friends attended.

Wm. Babbey was about the only man in town to display a flag on the 24th. It is quite apparent Gleichen is not a flag flying town.

Better health and greater happiness for children are expected from the spending of the family allowance, it is stated. A family's basic needs include adequate food, clothing, shelter and medical supervision. Family allowance officials suggest that, when all these things have been provided, parents use what is left of their income for extras calculated to add zest to living.

TABER—Mrs. James Black and Miss Jean left for Edmonton to attend convocation at the University of Alberta which conferred the degree of bachelor of science in household economics on Miss Black. During the past year Miss Black was president of the Delta Delta Delta Society. She will proceed to Tranquille, B. C., where she has been granted an appointment in a 350 bed hospital for the months of June and July. In September Miss Black will proceed to Toronto where she has obtained a position in Eaton's on the company's clerical staff.

The latest thing in furniture manufacture in the United Kingdom is aluminium furniture. It has nothing in common with the metal furniture manufactured for office and aircraft in previous days with metal tubes for chair arms and backs, but might be of wood except for the faint gleam of metal behind its plastic covering, which gives it a pleasant glow. Wardrobes, tables, chairs are all of impressed aluminium finished with tinted, translucent plastic. Cupboard interiors have a bristable color rayon finish—chemical treated to make the The lining is of compressed plastic board, thus eliminating any trace of metallic sound when the furniture is touched. Cleaning is by wiping with a damp cloth, or polishing with furniture polish.

Standing in the other fellow's shoes won't help him if you yourself are off on the wrong foot.

CAPITAL—OTTAWA

vincial relations.
If Bracken as Progressive Conservative leader would continue the fight for the Dominion-Provincial settlement he started in 1941 his "views might be instructive to that other Conservative chief, Mr. Drew.

HUMANITY AND PROSPERITY
A special committee of the Senate opened an investigation into the question of immigration which has been troubling Canada's conscience.

Enlarged immigration is not practical nor possible until all of Canada's service men and their wives are settled at home and the shipping situation is improved. That condition will come soon, perhaps within a year, and the senators think that Canadians should decide now what they want to do.

It is recognized that there are wide differences of opinion in Canada as to how far Canada should go. Senator Reebuck wanted to know why Canada was not doing more to provide haven for European refugees.

"Agriculture and Industry need man power to expand, furthermore as an act to humanity Canada should open her doors to the freedom loving peoples."

TENDER CALL

SEALED TENDERS will be received by the Secretary of the Town of Gleichen up till noon, Friday, May 31st, 1946 for the purchase of the barn only, located on lots 11-14 in Block 12, Gleichen.

The barn is to be taken down and moved away. Full particulars may be had from the Town office.

Highest or any tendered not necessarily accepted.
